StatusBot Wiki

Contents

Need support? Join our Discord: https://discord.gg/HvJ4hSA

These docs will use the prefix **sb!**

This is the default prefix for the bot, if your guild uses a custom prefix, replace our prefix with yours in commands.

Contents:

1.1 Extensions

Extensions are a powerful way to use StatuBot, providing new, custom features. If you need any help, feel free to Join our Discord: https://discord.gg/HvJ4hSA

> **Warning:** Some extensions require a premium subscription to use.

> **Warning:** You need to be an admin on the server you wish to manage extensions for.

1.1.1 List of Extensions

StatusBot currently supports 2 monitors with more to come soon!

```
    Minecraft - Adds player count & ping to the MC server to the
    HyperChecker - Pings the IP/Domain you've set every 10 seconds & only updates␣
→the embed when it detects a change.

.. WARNING:: You can not use HyperChecker & Minecraft extension together.
```

1.1.2 Viewing Extensions

- You can run sb!extensions

or - Go to https://statusbot.xyz/dash & Select a guild, then you can go to your monitors page to view and edit extensions.

1.1.3 Enabling & Disabling Extensions

- In the guild you wish to enable an extension for

```
sb!extensions <monitorID> <extensionName>
```

Running this will enable the extension for that monitor & running it again disables the extension!

1.2 General

General bot features/commands. If you need any help, feel free to Join our Discord: https://discord.gg/HvJ4hSA

1.2.1 General

- Default Prefix: **sb!**
- We will be using this prefix throughout the rest of the docs, please replace it with your guild's prefix when running command.
- Get your current prefix by mentioning the bot.

1.2.2 Configure

Note: You need to be an admin to run the commands in this section.

- Configure your server by running:

```
sb!config
```

- Run first time server setup by running:

Note: This command can only be run once.

> **Warning:** Coming Soon.

```
sb!setup
```

You will be promted about various settings to change.

1.2.3 Commands

- For a general overview of commands in your guild, do:

```
sb!help
```

- For a more specific look at a command, do:

```
sb!help <command name>
```

1.3 Monitors

Monitors are the way to see the status of an IP/Domain. Here is a simple guide on everything about them. If you need anyhelp, feel free to Join our Discord: https://discord.gg/HvJ4hSA

> **Warning:** You need to be an admin on the guild to create/manage monitors.

1.3.1 Viewing Monitors

- Overview of all monitors

For a quick overview of all the monitors on your guild, run:

```
sb!monitors
```

This will show you every monitor on your guild, along with the Status, ID & Name of the monitors.

- View Individual monitors

To view a individual monitor, you can run:

```
sb!monitor <monitor id>
```

Running this command will provide more information on the monitor.

> **Note:** You get the **<monitor id>** from running the *monitors* command.

1.3.2 Creating Monitors

- Create a monitor

To create a monitor simply run the following:

```
sb!create
```

The bot will prompt you with questions to setup the monitor.

1.3.3 Configuring Monitors

- Configuring Monitors

When configuring a monitors settings, the base syntax is:

```
sb!monitor <monitor id> <setting> <new value>
```

Note: The **<new value>** doesn't have to be there for all settings.

The following tables will provide information on each setting.

Note: All settings are case insensitive in commands

Setting	New Value Required?	Posible new values	Description
name	Yes	Any string	The name of the monitor
ip	Yes	Any valid domain or ip address	The domain or ip of the monitor
domain	Yes	Any valid domain or ip address	The domain or ip of the monitor
enabled	No	Any value inputed will be ignored	Toggle wether the monitor is enabled or not
enable	No	Any value inputed will be ignored	Enable the monitor
disable	No	Any value inputed will be ignored	Disable the monitor
hidden	No	Any value inputed will be ignored	Toggle wether the monitor ip is hidden or not

Premium Settings: These settings are only avaliable to premium guilds

Setting	New Value Required?	Posible new values	Description
footer	Yes	Any string	The footer of the monitor embed
online title	Yes	Any string	The title of the embed, when the status is online
online color	Yes	A valid hexadecimal color in the form of "#af35bc"	The sidebar color of the embed, when the status is online
offline title	Yes	Any string	The title of the embed, when the status is offline
offline color	Yes	A valid hexadecimal color in the form of "#af35bc"	The sidebar color of the embed, when the status is offline

1.3.4 Deleting Monitors

- Deleting a monitor

To delete an individual monitor run the following:

```
sb!delete <monitor id | monitor name>
```

Note: | means "or"

- Deleting all the monitors

To delete all monitors run the following

> **Warning:** In Developement

```
sb!delete all
```
